Contents

PART 1

1 Editorial
3 Book reviews
7 Sieve-plate pores, open or occluded? A critical review
D. C. Spanner
21 An apparatus for measuring photosynthetic quantum yields and quanta absorption spectra of intact plants
G. Öquist, J. -E. Hällgren and L. Brunes
29 Quaternary structure changes and kinetics of urease inactivation by L-usnic acid in relation to the regulation of nutrient transfer between lichen symbionts
C. Vicente, A. Azpiroz, M. P. Estévez and M. L. González
35 The turbulent boundary layer over a flapping *Populus* leaf (Short communication)
J. Grace
39 Effect of brief treatments with benzyl-adenine on growth and development of watermelon cotyledons
G. P. Longo, M. Olginati, G. Rossi, M. Valente and C. P. Longo
45 Sucrose transport by seedlings of *Ricinus communis* L.: the export of sucrose from the cotyledons to the hypocotyl as a function of sucrose concentration in the cotyledons
J. Waldhauser and E. Komor
51 Photosynthetic characteristics of the leaves of 'Golden Delicious' apple trees
R. L. Watson, J. J. Landsberg and M. R. Thorpe
59 Correction of infra-red gas analyser readings for changes in reference tube CO_2 concentration (Technical report)
M. R. Thorpe
61 Phytochrome control of the growth and development of *Rumex obtusifolius* under simulated canopy light environments
J. S. McLaren and H. Smith
69 Regulation of plant water potential by membranes of the endodermis in young roots
D. B. B. Powell

PART 2

77 Book reviews
81 Photoreceptors for biosynthesis, energy storage and vision (Review article commissioned by the Editor)
D. Presti and M. Delbrück
101 The physiology of seed hydration and dehydration, and the relation between water stress and the control of germination: a review
T. W. Hegarty
121 Membrane potentials and salt distribution in epidermal bladders and photosynthetic tissue of *Mesembryanthemum crystallinum* L.
U. Lüttge, E. Fischer and E. Steudle
131 Sapwood water storage: its contribution to transpiration and effect upon water conductance through the stems of old-growth Douglas-fir
R. H. Waring and S. W. Running
141 Dawn signal as a rhythmical timer for the seasonal adaptive variation of CAM: a model
C. Morel and O. Queiroz
151 Auxin-controlled root growth and ethylene production (Short communication)
M. Dubucq, M. Hofinger and T. Gaspar
155 Light-dark modulation of glycogen phosphorylase activity in the blue-green alga, *Anacystis nidulans*
M. Lehmann and G. Wöber

PART 3

161 Book reviews
163 Biometrical studies of plant growth. 1. The Richards function, and its application in analysing the effects of temperature on leaf growth
D. R. Causton, C. O. Elias and P. Hadley
185 C_4 characteristics of photosynthesis in the C_3 alga *Hydrodictyon africanum*
J. A. Raven and S. M. Glidewell
199 Effects of external potassium supply on stomatal closure induced by abscisic acid
J. A. Wilson, A. B. Ogunkanmi and T. A. Mansfield
203 Mechanism of paraquat tolerance in perennial ryegrass. I. Uptake, metabolism and translocation of paraquat
B. M. R. Harvey, J. Muldoon and D. B. Harper
211 Mechanism of paraquat tolerance in perennial ryegrass. II. Role of superoxide dismutase, catalase and peroxidase
D. B. Harper and B. M. R. Harvey
217 Are developing xylem vessels the site of ion exudation from root to shoot?
A. Läuchli, M. G. Pitman, U. Lüttge, D. Kramer and E. Ball
225 Citrus leaf abscission. Regulatory role of exogenous auxin and ethylene on peroxidases and endogenous growth substances

T. Gaspar, R. Goren, M. Huberman and M. Dubucq
231 Effect of temperature on ion content, ion fluxes and energy metabolism in *Chara corallina*
J. A. Raven and F. A. Smith

PART 4

239 Book reviews
241 Chilling injury in plants—the role of membrane lipid fluidity
J. Wolfe
249 Mechanism of iron uptake by plants
J. C. Brown
259 Stomatal mechanics: volume changes during opening
P. J. H. Sharpe & H.-I. Wu
269 Photosynthesis and transpiration of an isolated tree: model and validation
M. R. Thorpe, B. Saugier, S. Auger, A. Berger & M. Methy
279 Radial electrogenic activity in the stem of *Vigna sesquipedalis*: involvement of Spatially separate pumps
H. Okamoto, K. Ichino & K. Katou
285 The effect of low temperature on the phloem transport of radioactive assimilates in the stolon of *Saxifraga sarmentosa* L.
I. S. Chamberlain & D. C. Spanner
291 Cd uptake by intact wheat plants
J. Smeyers-Verbeke, M. De Graeve, M. Francois, R. De Jaegere & D. L. Massart
297 Transport of glutamine into isolated pea chloroplasts
D. J. Barber & D. A. Thurman
305 Transport of purines and pyrimidines into isolated pea chloroplasts
D. J. Barber & D. A. Thurman
307 The carbon gain benefits of solar tracking in a desert annual
H. A. Mooney & J. R. Ehleringer
313 An inhibitory effect of excess moisture on the early development of *Sinapis alba* L. seedlings
I. R. Macdonald & D. C. Gordon
